

76084 Sponsors Roll of Honour

76084 returned to traffic on the 21 July 2013 mainly through the generous sponsorship of parts by shareholders and supporters alike. The list below runs to 150 entries and represents a significant amount of capital investment from enthusiastic people.

The Board of Directors are extremely grateful for this your contribution to the project and share with you the desire to see 76084 working again at the head of a passenger train on Network Rail metals to which end another parts sponsorship scheme has been launched - to fit TPWS equipment.

To all those on this extensive *Return to Steam Roll of Honour* a **BIG** thank you.
